

THE MAXBULLET® HARDWARE SYSTEM CAN BE MOUNTED TWO WAYS

- Above opening
- Inside mount within opening

HELPFUL HINTS FOR MEASURING

When using side wall mount, overlap the opening at least 3 inches on each side and 1 foot above the door opening for a better seal. Therefore, order your door 1 foot taller and 6 inches wider than actual door opening.

When using an inside mount, order the same size door kit as your clear opening.

- For taller doors, the strips should be heavier and wider.
- Narrow strips are easier to pass through than the wider strips.
- When air movement is a problem, choose the wider strip.
- Fasteners for mounting hardware to the existing building materials are **not** included.

Products Available from Centaur®

KleerFlex Door®

Clear flexible strip doors offer a brilliant solution to doorways

Fence Systems:

RAIL FENCING

- Hot Rail® 5" Flexible Rail (Electric)
